

INTEGRATION PERFORMANCE

IP-BMW42

The 2-way IP-BMW42 component system was designed for music lovers wanting to upgrade their original BMW speaker system with a dynamic, Hi-Fidelity sound. Featuring DirectFit, the unique 4-inch (100mm) chassis design with supplied mounting brackets, easy snap-in 28mm tweeters, and factory wire connections allow the IP-BMW42 to fit modern BMW models without the need for modification.

What truly sets apart the IP-BMW42 is the handcrafted MT100 tweeter based on Morel's legendary design. A powerful neodymium magnet motor and 1.1" (28mm) silk dome give it exceptional resolution and a broad soundstage, setting a new benchmark in plug-and-play systems.

Key advantages

- Quick & Easy installation
- No need for any modification
- Optimized for BMW to deliver HiFi quality sound
- Plug and Play wire connection
- All mounting hardware is included for ALL BMW models
- Installation tools included
